Sources and notes

1. Financial statements: Microsoft Form 10-K for the fiscal year ended June 30, 2026 (SEC XBRL data); FY2021–FY2025 from prior 10-K filings. All periods end June 30.
2. Share price: Nasdaq closing price on October 15, 2026 ($539.44), unadjusted (Yahoo Finance daily history).
3. Market cap = share price × 7,427M common shares outstanding as reported in the FY2026 10-K balance sheet data.
4. Enterprise value = market cap + total debt (current portion $9,227M + long-term $31,067M) − cash & equivalents ($20,935M) − short-term investments ($55,908M); leases excluded.
5. Free cash flow = cash from operations ($182,935M) − additions to property and equipment ($115,948M). Finance-lease additions not deducted.
6. Operating margin = operating income ÷ revenue. Growth rates and CAGRs computed from reported revenue and operating income. Chart values in $ billions, rounded to one decimal.
7. Data compiled October 15, 2026; financials reflect the June 30, 2026 fiscal year-end; share price is as of October 15, 2026.
